Profile

Experienced Full Stack Mobile Engineer with a demonstrated history of working in the technology industry. Skilled in Android development, Flutter, backend development with Node.js and Spring Boot, and cloud infrastructure management. Passionate about gaming and recognized as a top African professional Call of Duty Mobile (CODM) gamer with years of competitive gaming experience. Eager to leverage my technical expertise and gaming background to contribute to the innovative projects at gamr.

Professional Experience

01/2024 – present
Lagos, Nigeria

Full-Stack Developer, *SystemSpecs Limited (Remita)* ✉

- Architected and implemented robust backend APIs using Spring Boot to manage user data, transactions, and core functionalities essential for a seamless user experience. This includes account creation, authentication and authorization mechanisms, session management, and in-app navigation.
- Spearheaded the development of specialized APIs for advert management, facilitating targeted advertising campaigns and maximizing revenue generation.
- Engineered payment and transaction APIs with a focus on security, scalability, and compliance with industry standards, ensuring seamless financial transactions within the application.
- Implemented CRUD operations APIs to support various features, enabling efficient data management and manipulation across the platform.
- Utilized industry best practices, such as RESTful design principles, input validation, error handling, and documentation, to ensure the reliability, maintainability, and scalability of the APIs.
- Collaborated closely with frontend developers, product managers, and stakeholders to understand requirements, define API contracts, and deliver high-quality solutions that meet business objectives.

02/2021 – 2023
Lagos, Nigeria

Full-Stack Developer, *Novugrid Technologies*

Backend Development (Node.js) Feb 2023 - Dec 2023

- Developed and maintained robust APIs for the Noja mobile application using Node.js, focusing on critical functionalities like:
- Wallet and Payment Processing: Built secure APIs integrating with payment gateways such as Paystack and Monnify to handle user wallets, transactions, and seamless payment processing.

- Order and Transaction Management: Developed APIs to manage the entire order lifecycle, including order placement, payment processing, and fulfillment.
- Complex Data Queries: Implemented efficient querying strategies to handle complex data retrieval and manipulation for various functionalities within the application.
- Utilized unit and integration testing frameworks to ensure the reliability and scalability of the backend APIs

Mobile Developer 2021-2023

- Played a pivotal role in developing the Noja mobile application (over 10,000 downloads), a comprehensive business management solution for entrepreneurs. This experience equipped me with the skills necessary to contribute to a successful mobile product with a large user base.
- Leveraged Flutter to develop core functionalities, delivering a seamless user experience.
- Developed features for inventory tracking, customer management, profile management, and wallet management, enhancing user engagement and enabling efficient business operations.
- Collaborated with designers to ensure a user-friendly and intuitive interface.

09/2021 – 12/2021
Abuja, Nigeria

Android Engineer (Contract), NNPC

- Developed an in-house app optimizing inventory management, resulting in a 50% increase in work rate. Implemented features such as barcode scanning and a sophisticated Custom UI.
- Contributed to a feature utilizing RFID technology for scanning items and displaying relevant information.

03/2020 – 12/2020
Lagos, Nigeria

Android Developer (Contract), PixelsHub

- Automated and streamlined the CI/CD process, reducing PR check time from 40 minutes to a maximum of 20 minutes.
- Actively contributed to feature development, improved developer tooling, and defined language standards.
- Specialized in real-time communication using sockets for enhanced user interaction.

04/2019 – 06/2019
Lagos, Nigeria

Android Developer Intern, Hotels.ng (Hng)

Designed the chat and user profile screens for the Afrivac Android app, contributing to the overall app aesthetics.

Skills

Java/Kotlin

Git

RxJava

NodeJs

Dart
